

INSTITUTE OF ROAD TRAFFIC EDUCATION

Training Programme Road Safety Engineering

21 - 23 December 2015

in collaboration with

College of Traffic Management

Preamble

Dr. Rohit Baluja

President-Institute of Road Traffic Education
& Director- College of Traffic Management

"Our journey is just the beginning of a struggle, enlightenment, discovery, patience, action and partnerships."

Every component of the road system which includes the vehicle, road infrastructure, traffic engineering, driver training, education and awareness programmes as well as the laws that govern the road, must have safety as an inherent virtue. This is now being recognized by many a traffic management experts the world over.

Road Safety cannot be an external element which could be imposed upon the different components of road system to deliver safety. The deliberations at the World Forum, The Global Road Safety Crisis, by the United Nations in April 2004 revolved around the fact that only a balanced participation from all the stakeholders including the government, automobile, oil and insurance industries, various NGOs working in this field and the common man can together bring about a paradigm shift in the approach towards dealing with this grave social problem. IRTE's journey since 1991 has dwelt upon catalysing development of infrastructure in the fields of traffic engineering, traffic enforcement, enforcement technology, driver training and testing systems, public participation and building awareness.

Our efforts have been based upon scientific research and development supported by educational and training programmes. Most of IRTE's programmes have seen phenomenal success because each one of them was channelled through process of research, implementation and audit and was dedicated to the nation.

We are grateful to the National Highway Authority of India for giving IRTE the opportunity to support the highway operation stakeholders towards building their capacity in order to mitigate serious and fatal injuries occurring due to road crashes in India.

Participants Fee

COURSE	FEE
Three day Course Road Safety Engineering	INR 26,500 + 14% taxes (Rs. 30,210)

The fee includes :

- Course Material
- Accomodation in three star property (inclusive of breakfast & dinner)
- Transportation from hotel to college and back
- Lunch
- Am/Pm tea.

Payment Details

Cheque/Demand Draft favouring: Institute of Road Traffic Education

Electronic Transfer A/C: Institute of Road Traffic Education, Swift Code - CNRBINBBDXN
IFSC CODE : CNRB0000390

A/C No.: 0390101075329

Bank Address: Canara Bank, DDA Building, Nehru Place, Delhi- 110019

WAYS TO REGISTER

Download registration form the Website: www.irte.com
This can be filled & emailed from the site or separately emailed to: legaldesk@irte.com, the form can also be faxed to : + 91 11 26817965 or +91 129 298 9095

POSTAL ADDRESS

Course Secretariat, Institute of Road Traffic Education
College of Traffic Management
Surajkund-Badkhal Road, Sector-43,, Faridabd-121001, NCR Delhi.

AIMS & OBJECTIVES

In order to augment the safety acquaintance of the engineers of NHAI, PWD as well as those of Concessionaries. who are involved in planning, design, construction and operation of roads and highways in the country, specific and need based training programmes would be of great help.

These capacity building programmes in Road Safety Engineering will help their organizations catalyze monitoring and evaluation of strategies regarding Road Safety Management including Road Safety Audit and Road Accident Investigation in their respective domains in order to create an environment which supports the movement of traffic in the most efficient and comfortable manner with optimum levels of road safety.

Course Content:

The IRTE invites participation in the three day residential course on Road Safety Engineering at the College of Traffic Management, situated on the Surajkund Badkhal Road, adjacent to the Manav Rachna International University, Sector-43, Faridabad. The curriculum and modules of this course will include the components of :

- ↳ Traffic Engineering
- ↳ Road Safety Audit
- ↳ Black Spot Analysis
- ↳ Road Crash Investigation
- ↳ Traffic Legislation & Standards of Traffic Control Devices
- ↳ Post Crash Management

Target Participants:

Traffic Engineers and Road Safety Managers from the Concessionaires involved with the National Highway Authority of India (NHAI) as well as the engineers of the NHAI and PWD.
